

Digital Photo Printing

The Chromira difference...

The Lab Works was the first facility in Canada to offer Digital Photographic Prints printed on award-winning Chromira LED printers. The Chromira's incredible resolution is achieved through it's unique diamond-shaped pixels and the optical blending that occurs when they overlap. Our printers are ICC profiled for Kodak Ultra papers resulting in optimum colour on final output. Shadow and highlight detail are superb; text looks sharp and overall tonality is great. The Chromira also renders beautiful flesh tones and neutral grays.

Chromira digital prints are true photographic prints, exposed with LED light. We can print an image area of 30" by any length with immaculate fidelity, resolution and sharpness – ideal for large display and banner applications. This printer makes the combination of text and imagery a breeze.

When submitting files please ensure they are 8 bit RGB.tiff or RGB.jpeg. Avoid layers, channels, selections, LZW compression.

Online Ordering

Online ordering is easy @ www.thelabworks.com. Go to Digital Products & Services ... Software to make it easy. Use our Roes order system through your browser or download this Java application to your desktop. Complete your information and then browse your folder of images (jpegs only please), pick your product and you're off. Choose from our Mini and Pocket Album catalogue or the Digital Printing catalogue or the Metallic Printing catalogue. Many custom sizes available. When sending an order, make sure to check your queue to see if the order has finished sending, before closing your browser or allowing your system to go to sleep. Works with either a Mac or PC.

Metallic Paper

Kodak Endura Metallic Paper features a unique metallic/pearlescent look, giving images a brilliance unlike any other output media. Detail is sharp, colours are saturated, flesh tones look natural, and an ultra-bright background helps images really pop. Colour Metallic paper resists tearing, curling and fingerprints to help it stay looking great in demanding retail environments. It's so tough that no lamination is needed.

In Lab Print Ready Pricing

This special pricing is for digitally captured files requiring minimal intervention. This service is geared for shooters who provide tagged images with proper profiling for good colour and density. Files also need to be "print ready" meaning sizing, cropping, and retouching is done. Files may be previewed using The Lab Works printer profile. Files can be provided on USB flash drives, CD, DVD, FTP or via email. Let us know your quantities and sizes. The price for this streamlined service is \$10.00 per sq. ft. (See price chart.)

High Resolution Scans

We can drum scan your transparencies, or prints up to 8x10 inches on our 11000 dpi drum scanner maintaining detail in both shadow and highlight areas. Scans are contrast & colour corrected, cleaned and saved in any format supported by PhotoShop. 1-2 day turnaround.

RGB Scans

up to 15 MB	\$ 15.00	101 - 150 MB	69.50

Craftsmanship...

There will always be a special place in our hearts for traditional film processing and printing. We remain dedicated to retaining the equipment and expertise required to continue our proud tradition of craftsmanship.

Film Processing

Q-Lab, E6, Slide Processing

Turn around time up to 5 days. Our technicians have undergone special training as part of the Q-Lab program, and monitor each chemical process for several control factors. It means consistency, accurate colour, and density every time you have your slides or transparencies processed at The Lab Works. All film is processed in a Dip and Dunk processor, only the chemistry touches your film.

Size	Process & Sleeve	Process & Mount
135/24	\$ 7.80	\$ 10.25

Smile!

The first commandment of photography...

We've all experienced it. Within a few minutes of birth someone has a lens in your face and is requesting a smile. At The Lab Works, we're proud to maintain the long-standing relationship between this facial expression and the world of photography. Smiles have been the currency of our business since we opened in 1988.

The Lab Works.
