

Digital Photo Printing

The Chromira difference...

The Lab Works was the first facility in Canada to offer Digital Photographic Prints printed on award-winning Chromira LED printers. The Chromira's incredible resolution is achieved through it's unique diamond-shaped pixels and the optical blending that occurs when they overlap. Our printers are ICC profiled for Kodak Ultra papers resulting in optimum colour on final output. Shadow and highlight detail are superb, text looks sharp and overall tonality is great. The Chromira also renders beautiful flesh tones and neutral grays.

Chromira digital prints are true photographic prints, exposed with LED light. We can print an image area of 30" by any length with immaculate fidelity, resolution and sharpness – ideal for large display and banner applications. This printer makes the combination of text and imagery a breeze.

When submitting files please ensure they are 8 bit RGB.tiff or RGB.jpeg. Avoid layers, channels, selections, LZW compression.

Online Ordering

Online ordering is easy @ www.thelabworks.com. Go to Digital Products & Services ... Software to make it easy. Use our Roes order system through your browser or download this Java application to your desktop. Complete your information and then browse your folder of images (jpegs only please), pick your product and you're off. Choose from our Mini and Pocket Album catalogue or the Digital Printing catalogue or the Metallic Printing catalogue. Many custom sizes available. When sending an order, make sure to check your queue to see if the order has finished sending, before closing your browser or allowing your system to go to sleep. Works with either a Mac or PC.

Metallic Paper

Kodak Endura Metallic Paper features a unique metallic/pearlescent look, giving images a brilliance unlike any other output media. Detail is sharp, colours are saturated, flesh tones look natural, and an ultra-bright background helps images really pop. Colour Metallic paper resists tearing, curling and fingerprints to help it stay looking great in demanding retail environments. It's so tough that no lamination is needed.

Digital Copy Work/Retouching

The Lab Works offers complete digital copy and output services. Simply bring in your original and we'll capture it digitally, perform any colour management required and provide you with a proof for your approval. The image can then be output to your specifications. Digital capture, proof and CD included.

Unique items requiring special handling will be subject to a surcharge.

Originals up to 16x20 \$47.50
 Originals larger than 16x20 \$73.00
 Digital retouching as per quote on a job to job basis. \$80.00/hour
 Archiving digital copy work onto a disk. CDR \$11.00 / DVD \$15.00

Photo Books

Showcase your special images in an elegant photo book, printed on true photographic paper and assembled with care at The Lab Works. When it comes to capturing your treasured memories, you just can't beat the colour fidelity and subtle tonal range of images created on photographic paper. A wide variety of bindery options are available to complement any subject matter – weddings, family albums, vacations, sales and promotional pieces, special occasions, whatever!

Float & Plaque Mounting

The Lab Works is pleased to offer these exciting and economical framing options. Prices include UV laminate and a rainbow of edge colours to choose from.

Acrylic/Plexi Mount

Sleek and stylish. Acrylic front surface on plaquemount, floatmount or flushmounts. This innovative product transforms a great image into a stunning piece of artwork. The translucent nature of the material creates a visual impact that enhances any surrounding. The natural light entering your room interacts with the material creating depth and texture. Try it with a Metallic surface print for added impact.

Craftsmanship...

There will always be a special place in our hearts for traditional film processing and printing. We remain dedicated to retaining the equipment and expertise required to continue our proud tradition of craftsmanship.

Film Processing

Q-Lab / E6 / Slide

Turn around time up to 5 days. Our technicians have undergone special training as part of the Q-Lab program, and monitor each chemical process for several control factors. It means consistency, accurate colour, and density every time you have your slides or transparencies processed at The Lab Works. All film is processed in a dip and dunk processor, only the chemistry touches your film.

C41 Colour Negative

Turnaround time 3-4 days. C41 film is processed in a dip and dunk film processor, only the chemistry touches the film.

Black & White Film

Turnaround time 3-4 days. Black & white film is processed in a dip & dunk processor. Enlarged contact sheet in b/w is available.

Size	E6 Sleeve	E6 Mount	C41 Sleeve	B&W Sleeve	C41 / B&W Process & Contact
